Professional Profile

Visual Communication Designer with an emphasis on corporate identity, frontend development, and AI-augmented creative workflows. I stand out for my ability to bridge traditional design craft with emerging technologies, building interactive experiences, integrating generative AI tools into production pipelines, and using code to extend what design can do. I have experience designing for various media and collaborating with multicultural teams on international projects. My current focus is on the intersection of visual design, frontend development, and creative AI, areas where I combine tools like Figma, HTML/JS, Adobe Firefly, and Claude to produce work that is both visually precise and technically grounded.

Employment History

Creative Production Artist – United States (Remote)

Inspired Thinking Group (August 2025 – Present)

- Produce and adapt creative assets for Walgreens USA, focusing on weekly ads and national-level advertising materials.
- Develops artboards, layouts, alternate versions, copy adjustments, and photo direction slides, ensuring technical accuracy, visual consistency, and strict adherence to brand guidelines.
- Prepares final production-ready files with high quality standards.
- Supports the creation and adaptation of POP and printed materials for P&G, ensuring precise execution aligned with global brand requirements.
- Collaborates with global teams in a fast-paced environment, combining creativity, attention to detail, and operational efficiency to meet deadlines and strategic objectives.
- Integrates AI-powered tools (Adobe Firefly, generative AI) into the creative production workflow to accelerate asset generation while maintaining brand compliance.
- Uses Claude Code to write and debug production scripts, reducing manual task time and streamlining repetitive processes.

Publications, Branding, and Graphic Design Intern

Alliance Bioversity International & CIAT (January – July 2025)

- Designed and adapted graphic materials aligned with the institutional visual identity.
- Produced strategic visual content for social media, reports, and scientific publications.
- Analyzed social media metrics to support strategic decisions.
- Collaborated with interdisciplinary teams in a multicultural environment, strengthening communication and adaptability skills.

Director of Digital Strategies and Branding

Ser Quantum (2023 – 2024)

- Led branding and digital marketing strategies focused on growth and brand positioning.
- Planned advertising campaigns and designed visual assets for social media.
- Analyzed key metrics to evaluate results and recommend improvements to communication strategies.

Graphic Designer & Social Media Manager

Freelance (2022 – 2025)

- Designed packaging, logos, and brand identity guidelines.
- Created and managed social media content and strategies, including posts and digital advertising.
- Analyzed metrics and results to optimize campaigns and improve audience engagement.

Education

Pontificia Universidad Javeriana Cali

B.A. in Visual Communication Design — 2021–2025

UADE (Universidad Argentina de la Empresa)

Completed coursework toward a B.A. in Advertising — 2019–2020

Technical Skills

- Advanced proficiency in the Adobe Creative Suite (Illustrator, InDesign, Photoshop, Premiere, After Effects), with hands-on experience using all design platforms and complementary tools like Canva and Figma.
- Skilled in Microsoft Office (Word, Excel, PowerPoint).
- Design and production of visual and audiovisual materials for digital and print media, aligned with corporate identity guidelines.
- Video recording and editing for digital and promotional content.
- Market research and audience analysis to support design, communication, and brand positioning strategies.
- Basic knowledge of digital advertising campaigns (Meta Ads, Google Ads).
- Web design and user experience (UX/UI), with a focus on clear visual structures and intuitive navigation.
- Frontend development with HTML and JavaScript, including landing pages and interactive prototypes.
- AI-augmented creative workflows using generative tools such as Claude, Adobe Firefly, ChatGPT, Higgsfield AI, and Nano Banana for visual content production.
- Code generation, debugging, and task automation using Claude Code.

Interpersonal Skills

- Creative and strategic thinking for visual storytelling and communication campaigns.
- Strong ability to analyze audiences and markets.
- Experience working in multicultural and dynamic environments.
- Proactive and self-directed in project management.
- Commitment to quality, ethics, and continuous learning.
- Effective collaboration with multidisciplinary teams.
- Ability to manage multiple projects and priorities in a fast-paced environment.
